Asia Now Resources Corp. (TSX-V: NOW) is exploring and developing potential world-class ore deposits in China. The Company is currently drilling at two key projects with potential large discoveries of gold, silver, copper and molybdenum ore deposits. Under the leadership of an experienced board and management team, the Company has been active in China since 2002. The Company has established offices, joint ventures and a significant network with the Chinese mining industry and governments. It has a sound balance sheet to take exploration into the next phase and take advantage of future opportunities in mining production.

**Asia Now will INTEGRATE CAPITAL,  
WESTERN TECHNOLOGY,  
DOMESTIC EXPERTISE AND OPPORTUNITY**

**HIGHLIGHTS**

- Asia Now Resources Corp. (TSX-V: NOW) Drilling two projects in China, both very large with outstanding potential to be world-class deposits
- Pursuing acquisition of property in production
  - cash flow
- Experienced management team and board
- Access to capital and sound balance sheet (~C\$6 million cash at Dec 31, 2008)

**China is UNDER-explored**

- China's geology is excellent for major deposits
- Major deposits known in surrounding countries, few in China
- Cause is history, laws and administration, NOT geology

**China is UNDER-developed**

- Large mines discouraged by how regulations are applied
- Large deposits are fragmented, not consolidated

**China is CHANGING**

- Current situation unsustainable
- Change is occurring, more must occur
  - Privatizing state-owned companies
  - Opening to foreign companies
